MONTHLY REPORT APRIL 2026

Key metrics, storage economics, and product progress - monthly snapshot

USAGE VOLUMES CT3

CT3 Monthly Report April 2026: key metrics for Public and Enterprise Cloud, community momentum, storage economics, and product progress. Metrics are calculated using a transparent methodology and are supported by on-chain data

Upload statistics 01- 30 Apr 2026

● Enterprise (68.03%)
● Public Cloud (31.97%)

- Total Uploaded **+7.57 PB**
- Avg daily throughput **258 TB/day**

Public Cloud

Private uploads **+2.42 PB**
Unique users **+21 763**
Files uploaded **+56 280**
Avg daily throughput **82 TB/day**

Enterprise

Enterprise Uploads **+5.15 PB**
Corporate clients **12**
Avg daily throughput **175 TB/day**

Daily uploaded volume 01- 30 Apr 2026

Storage utilization and platform activity continued to expand throughout the month, reflecting growing adoption and consistent demand for CT3 services. User engagement remains strong as both storage volumes and network participation increase steadily

EXPANDED ANALYTICS **CT3**

Upload success rate

Public Cloud 99.1%
Enterprise 98.9%

p95 upload throughput

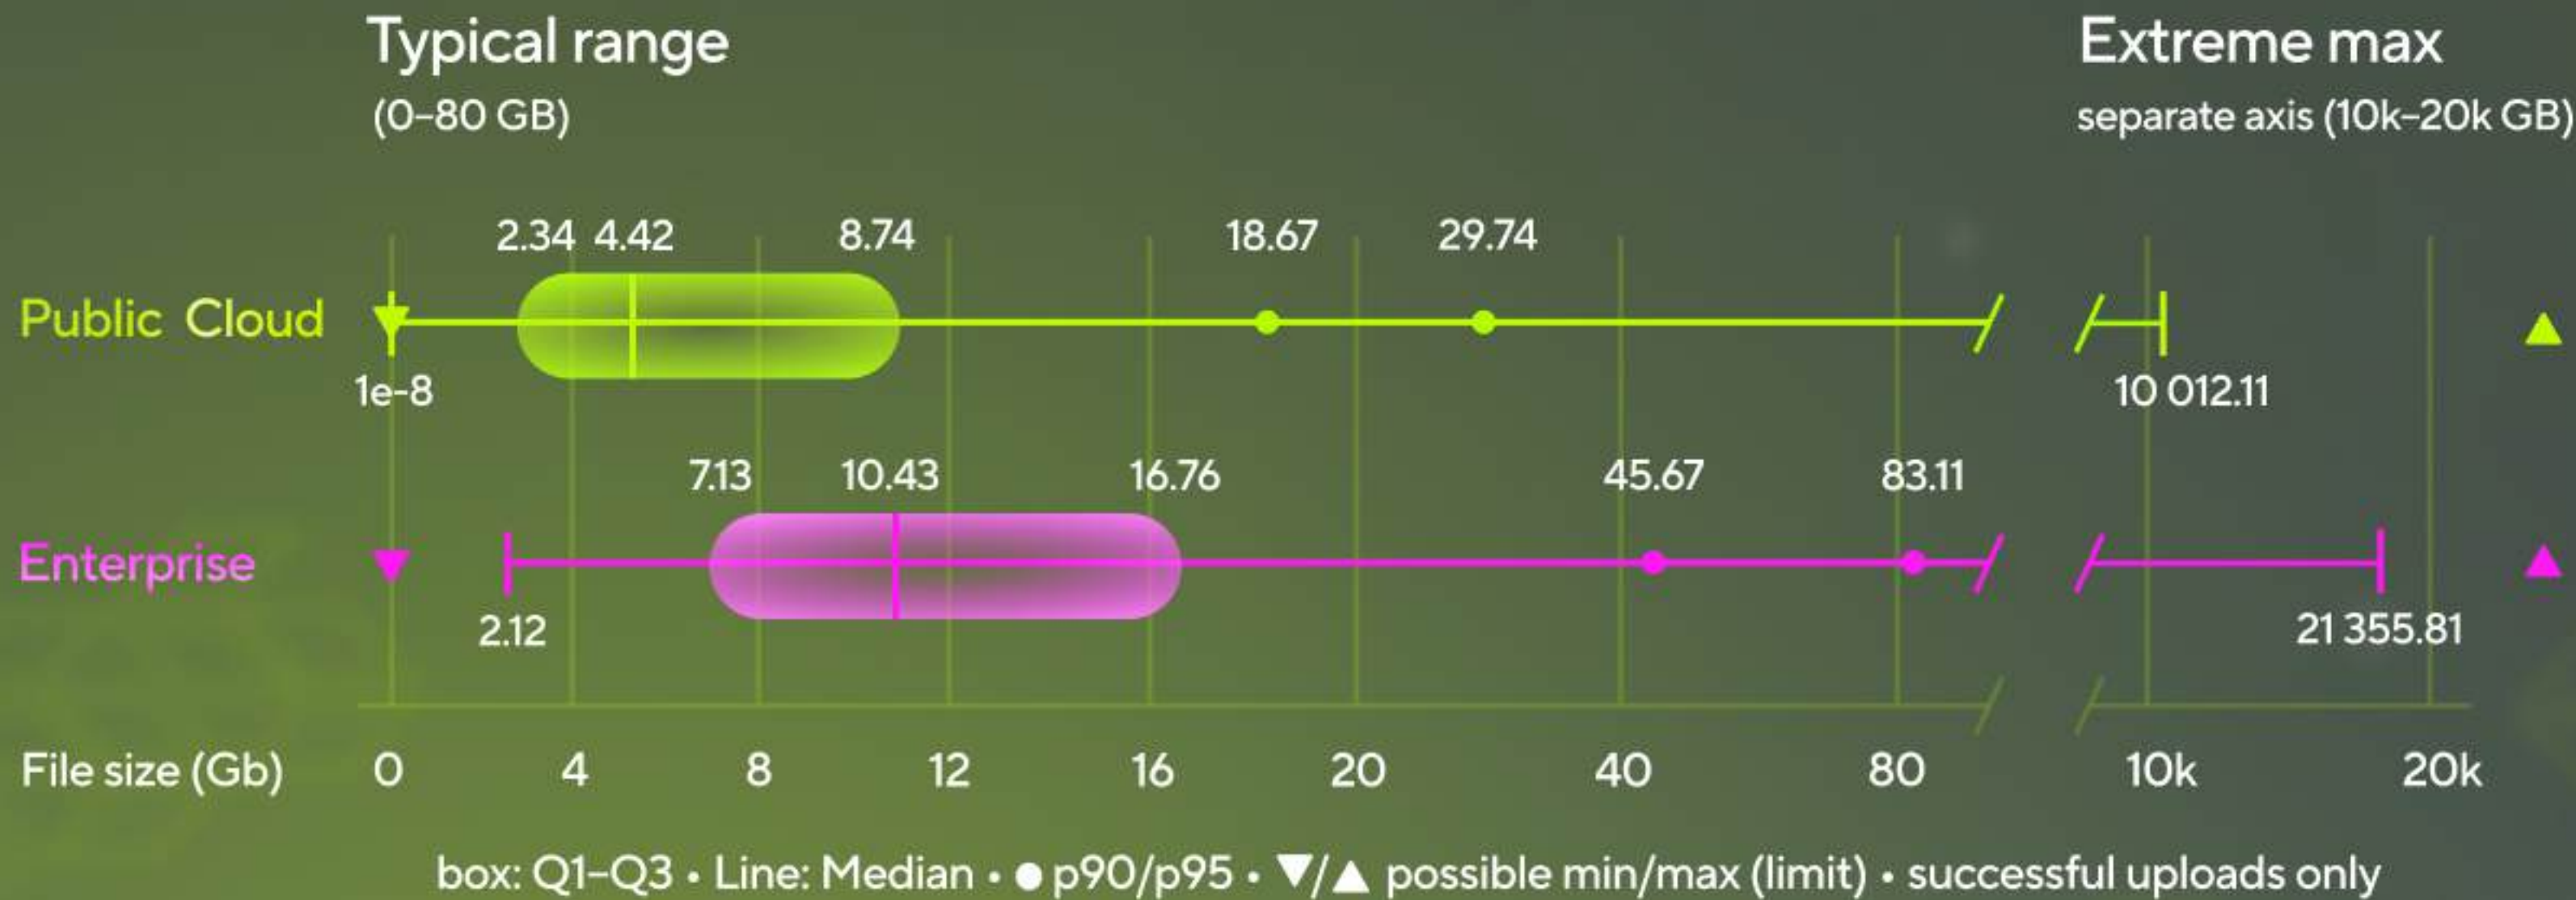

Public Cloud 17-27 MB/s
Enterprise 37-75 MB/s

Top failure reason

Timeout: 40%
Payment issues: 26%
Node unavailable: 8%
Other: 26%

File size profile (distribution) 01- 30 Apr 2026

Private repeat usage

● Returning (2+ uploads) 86%
● New uploaders 14%

ENTERPRISE CONTRACTS & ACTIVITY **CT3**

Enterprise snapshot

Total enterprise contracts **12**
New contracts this month **+2**
Enterprise uploads this month **+5.15 PB**

Enterprise upload throughput

New enterprise contracts

Sconzy Ltd

Segment: Telecom Advisory • **Region:** UK • **Contract term:** 7 years
Storage type: Hot storage • replication ×3 • controlled access
Company activity: The company specializes in telecommunication advisory and intermediary services, including support for infrastructure projects, coordination between providers and enterprise clients, and management of network and operational data. As part of its activities, the company handles technical documentation, logs, telemetry, and corporate communication archives that require fast access and reliable storage.

Ringguard Ltd

Segment: Network Services • **Region:** EU / UK • **Contract term:** 8 years
Storage type: Hot/Warm storage • replication ×3 • high availability (HA)
Company activity: The company works with enterprise telecom operations and infrastructure partnerships, supporting communication workflows, integration processes, and large-scale data coordination. Its day-to-day activity includes maintaining operational records, infrastructure analytics, internal reporting, and long-term service archives that require stable performance and continuous availability.

ECONOMICS & MONETIZATION CT3

Miner price (Gb/day)

Min	\$ 0.000028
Max	\$ 0.000040
Average	\$ 0.000034

User price (Gb/day)

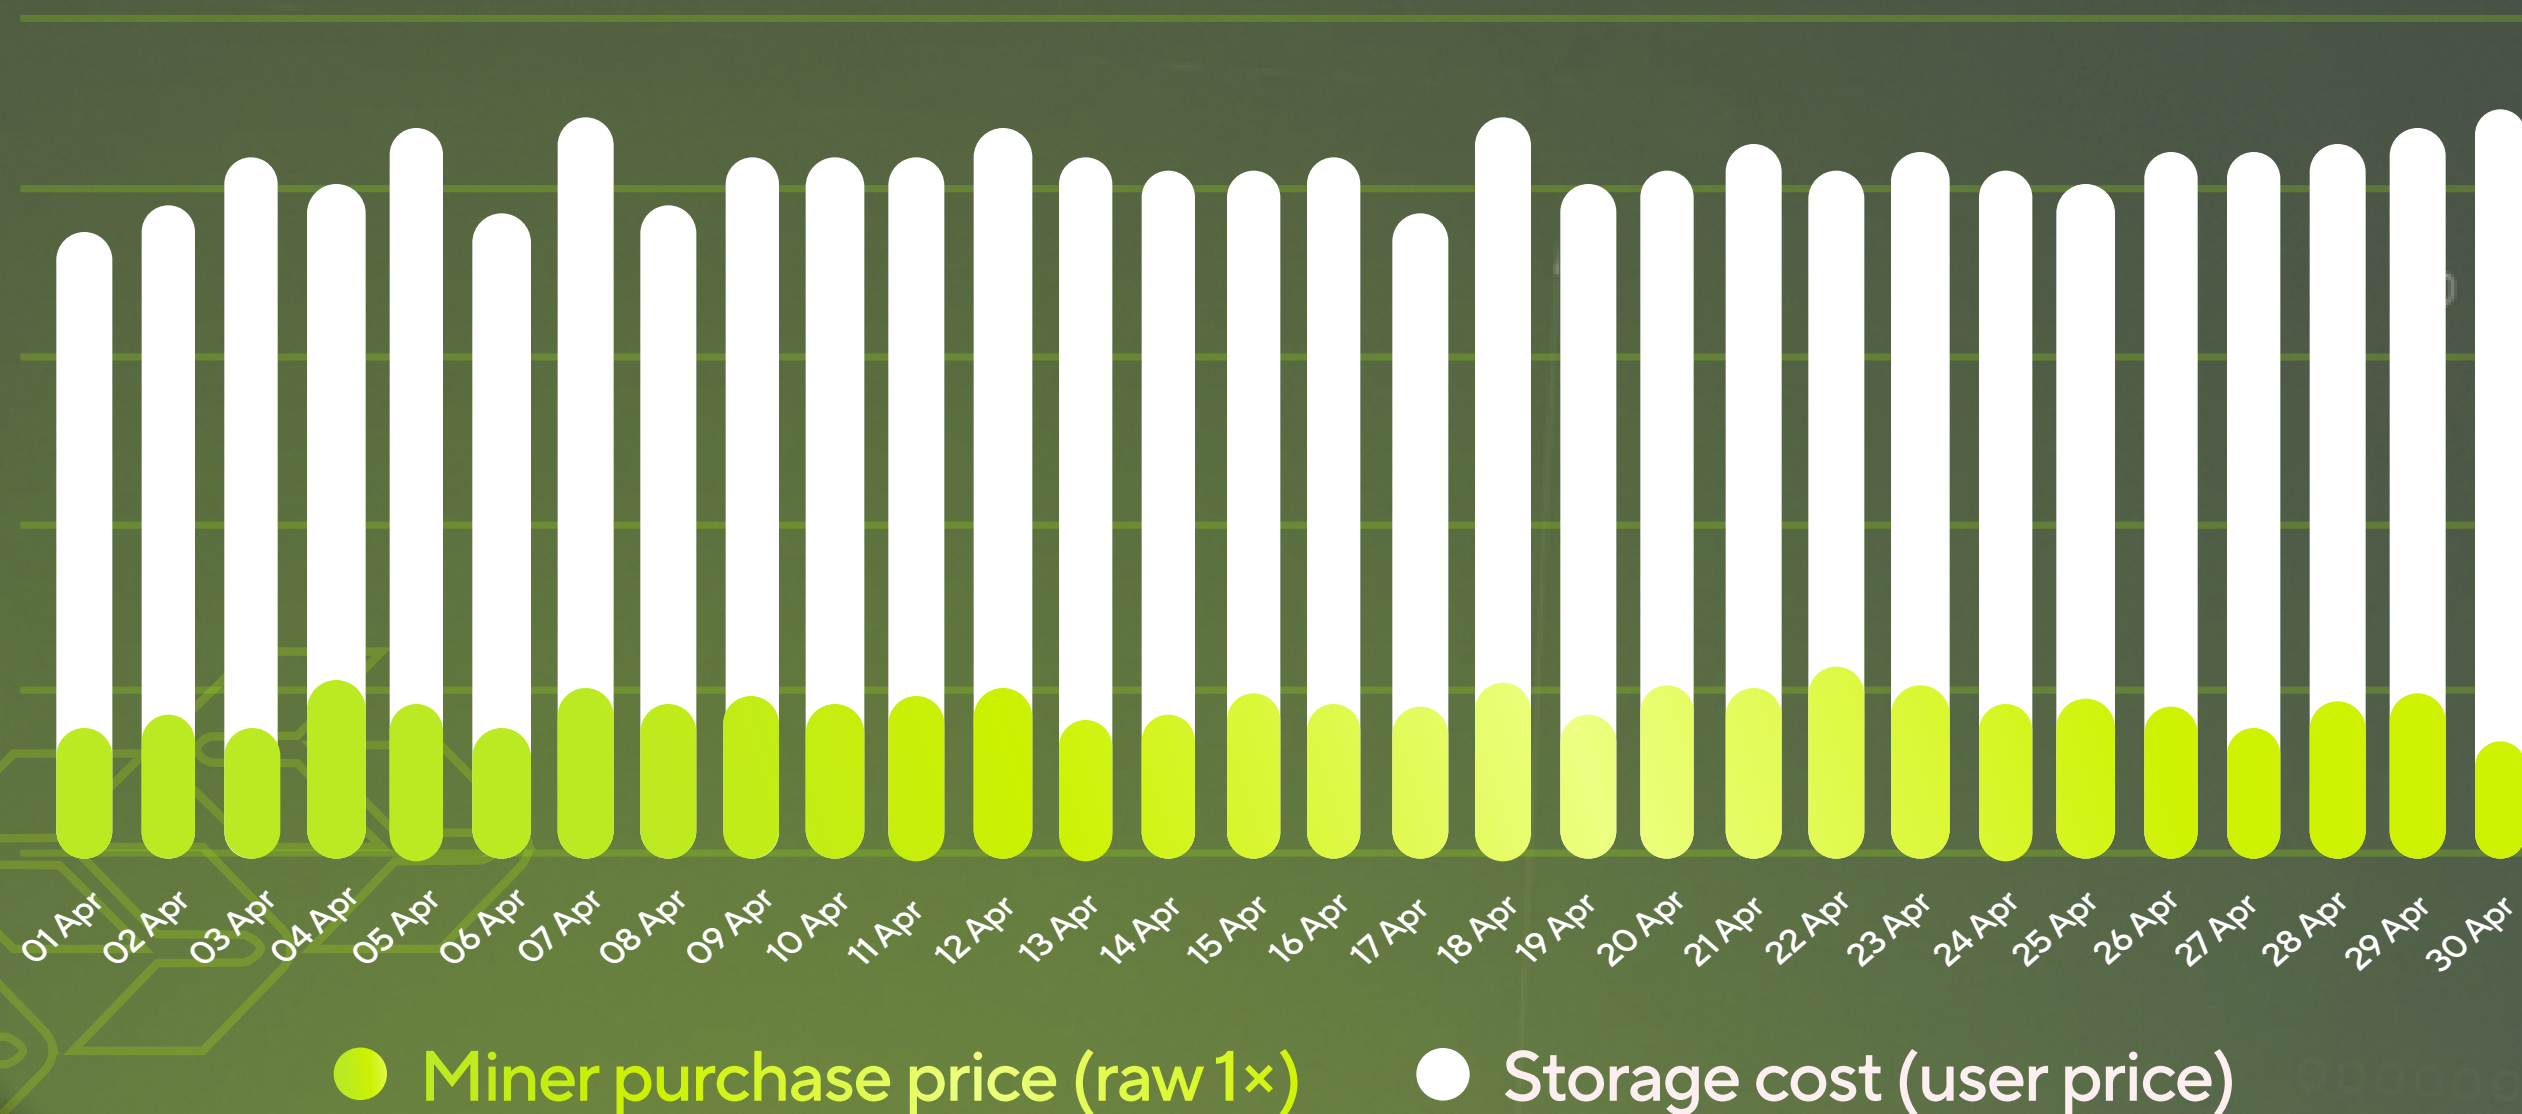

Min	\$ 0.00047
Max	\$ 0.00053
Average	\$ 0.0005

Effective storage cost

Min	\$ 0.000056
Max	\$ 0.00008
Average	\$ 0.000068

Pricing spread (USD/GB/day) 01- 30 Apr 2026

Drivers & notes

- Cost drivers on the supply side: miner raw 1× pricing, replication overhead (×2), and supporting infrastructure/operating costs (gateways, metadata, monitoring) collectively determine effective storage cost, the pricing spread, and overall unit economics
- Third month scaling phase: as platform activity and storage volumes continued to grow, CT3 maintained stable end-user pricing while further optimizing infrastructure efficiency, monitoring systems, and operational stability under increasing load.

CT3 March 2026 Report is Now Available

09 Apr 2026

Over the past month, CT3 significantly improved its infrastructure, resulting in a reduction in errors and failures, as well as an overall improvement in system performance. Metrics show steady growth: the number of new users increased by 10.6% compared to the previous month, while storage volume doubled. This indicates that users are returning to the service, confirming its practical applicability and competitiveness in a highly competitive market.

CT3 Secures New Enterprise Storage Contract with Sconzy Limited

20 Apr 2026

Under this contract, CT3 will provide decentralized cloud storage services for a period of 7 years, ensuring secure, reliable, and scalable data infrastructure tailored to the client's operational requirements. The agreement reflects growing demand for robust storage solutions among technology-focused organizations that require high standards of data integrity, availability, and long-term retention.

MONTH SUMMARY CT3

User growth
(MoM*)

-20.77%

Community growth
(MoM*)

+5.4%

Stored volume growth
(MoM*)

+43.1%

User price volatility

4.87%

Month conclusion

CT3 continued to strengthen the platform's core activity throughout the month, with uploaded data volumes reaching new highs and demonstrating growing engagement from the existing user base. As storage utilization remains the primary driver of the platform's economics and potential revenue generation, continued volume growth represents a positive signal for the long-term development of the ecosystem. Lower storage cost volatility compared to the previous month also indicates improving stability in CT3's infrastructure economics as the platform continues to scale.

Next month focus

Next month, CT3 plans to continue expanding its enterprise direction with a focus on the telecom sector, which remains one of the most promising and profitable use cases for the platform due to high storage volumes and long-term demand for data infrastructure. The main objective will be advancing ongoing negotiations and securing new contracts within the telecommunications industry

* MoM (Month-over-month) - is a metric used to measure short-term growth
